European Association for Panels and Profiles

Liability

The “European Association for Panels and Profiles” (PPA-Europe) located in Krefeld/Germany certifies and monitors at the wish of the manufacturers the sandwich panels and profiled sheets produced by them and awards the “EPAQ Quality Label” after successful certification.

In doing this, PPA-Europe and its representatives take the statutory regulations and the trust of end users in the certified products very seriously and make use of external experts for the substantive and technical examination of the construction products whose test results are checked once more by PPA-Europe. The same applies for the subsequent monitoring by PPA-Europe.

Nevertheless, it is possible that individual products unintentionally do not fully comply with the high level of quality and may lead to damage to the construction. If, in such a case, a claim is made on the manufacturer due to faulty quality or faulty delivery of the construction products, claims of recourse for this reason on PPA-Europe or its representatives may only be invoked in cases of intentional or grossly negligent behaviour during the certification or monitoring.

The certification and subsequent monitoring executed by PPA-Europe and its representatives do not affect the obligation of the manufacturer for a proper and constant level of quality and standard of the products.

With the exemption of intentional or grossly negligent action on the part of PPA-Europe and its representatives, we are only liable for the direct damage to the construction caused by the faulty product; all further subsequent damages are excluded.
