

ADVANCEMENTS FOR METAL BUILDINGS

CONGRESS

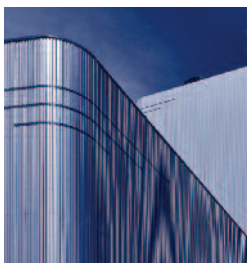

Marseille 14.-15.10.

19

IFBS

European Association for
Panels and Profiles

The light metal construction method is a young and dynamic process. Modern requirements with regard to energy savings, environmental protection and standardization within the European Market require closer cooperation in order to meet today's challenges.

In order to achieve these aims, PPA-Europe, the European Association for Panels and Profiles and IFBS, the International Association for Metal Building Envelopes, are working closely together. They complete each other in order to bring expertise on product quality, on adequate installation and on efficient advocacy at European level.

This congress will offer the participants the opportunity to operate in a network across the association borders, with the aim of both information exchange and building up new business partnerships. We have compiled a selection of subjects for you which include both current information about manufacturing and sales of your products as well as prospects for their use. We are pleased to invite all those interested to this congress. Participation does not require membership.

We are looking forward to greeting you in Marseille!

programme

Congress will run only in English language.

Monday, 14 th October		Tuesday, 15 th October
