CPR CONFERENCE

25th June 2012

2nd Panel: Simplification

G. Katsarakis
European Commission,
DG Enterprise and Industry
Unit G-5: Construction, Pressure Equipment, Metrology
SIMPLIFICATION

The CE marking under the CPD was considered burdensome and costly (particularly for SMEs and micro-enterprises).

Therefore the CPR:

- Simplifies procedures in both CE marking routes (CEN/EOTA),
- Introduces additional measures to compensate the disadvantage of micro-enterprises
SIMPLIFICATION

MAIN SIMPLIFIED PROCEDURES IN CPR:

• Art 36 on the use, under certain conditions, of appropriate technical documentation to show (without testing) that the product has a specific performance,

• Art 37 provisions on micro-enterprises

• Art 38 additional simplified procedures for certain products individually manufactured or custom made in small series.
Simpler, faster and more transparent procedures to obtain a European Technical Assessment (CPR Art. 20, Art. 21, Annex II)

Manufacturer has a say:

- *on the product assessment,*
- *on the choice of ess. characteristics to be assessed by the TAB.*
